

CLAIMS

- 1 1. An attachable bottle grip comprising a patch having a first surface, a second surface and a
2 perimeter, the first surface being opposite the second surface and having an adhesive applied
3 thereto for attaching the patch to a bottle, the second surface having a rough texture to aid a
4 grasp of a user when dispensing at least a portion of the contents of the bottle.
- 1 2. The attachable bottle grip of claim 1 wherein the second surface has a plurality of raised
2 features to aid the grasp of the user.
- 1 3. The attachable bottle grip of claim 1 wherein the second surface has a plurality of
2 dimples to aid the grasp of the user.
- 1 4. The attachable bottle grip of claim 1 wherein the perimeter of the patch is shaped to
2 accept a contour of the bottle.
- 1 5. The attachable bottle grip of claim 1 further comprising a removable protective layer
2 adjacent to the first surface for protecting the adhesive prior to attachment of the patch to the
3 bottle.
- 1 6. The attachable bottle grip of claim 1 wherein the second surface has a marking
2 identifying the contents of the bottle.
- 1 7. The attachable bottle grip of claim 1 wherein the perimeter of the patch is shaped to
2 identify the contents of the bottle.
- 1 8. An apparatus for assisting a user in dispensing contents, the apparatus comprising:
2 a bottle having an inner volume to hold the contents, an outer surface to be gripped by the
3 user and an opening;

4 a dispensing mechanism affixed to the bottle and extending through the opening, the
5 dispensing mechanism providing at least a portion of the contents to the user when activated by
6 the user; and

7 a patch affixed to the outer surface of the bottle, the patch having a textured outer surface
8 to aid the grip of the user when dispensing the contents.

1 9. The apparatus of claim 8 wherein the dispensing mechanism comprises a pump
2 mechanism.

1 10. The apparatus of claim 8 wherein the dispensing mechanism comprises a spray nozzle.

1 11. The apparatus of claim 8 wherein the patch has an adhesive layer in contact with the
2 outer surface of the bottle.

1 12. The apparatus of claim 8 wherein the bottle is a glass container.

1 13. The apparatus of claim 8 wherein the bottle is a plastic container.

1 14. The apparatus of claim 8 wherein the patch has a perimeter to complement a contour of
2 the bottle.

1 15. The apparatus of claim 8 wherein the patch is affixed to the bottle at a first location and
2 further comprising another patch affixed to the bottle at a second location.

1 16. The apparatus of claim 15 wherein the first location is diametrically opposite the second
2 location.
